

WICKES INTERIOR FRENCH DOORS

French doors do not just have to be used as a way of getting from the house to the garden. When used internally they can divide two rooms and also allow natural light in. Wickes range of internal

French doors provides a number of different options including folding doors, simple screens and even fitted wardrobes. You could even create your own “through” room, although if you are

intending to do so you must ensure that you do not weaken the structural strength of your house and you must contact your Local Building Control Office for guidance before you undertake the work.

Newland Pine Arched French Door

- 155-201 Newland Pine Arched French Doors. Glazed (pair)

Hardwood Range

- 187-453 Stockholm Oak Veneer French Doors
- 187-509 Stockholm Oak Veneer Frame

All the external frame dimensions are given for each of the projects listed. Use this leaflet to identify all the product requirements for your particular project. Brick or blockwork openings should be a minimum of 9mm larger to allow for adjustment and square fixing in the opening. Timber stud partitions should be made to the exact size ensuring that they are perfectly square. The height of the opening should also take into account any floor coverings to be laid later.

The overall dimensions of the French doors, side panels, and demi panels, are given in the component diagram.

These dimensions may be needed if fitting the doors/panels, into existing openings/linings or for making your own lining. You should add 4mm to the door width dimensions, and 3mm to the panel dimensions, when determining the internal lining width to allow for hinges and clearance. The lining height should take into account any floor coverings to be laid later and allow a further 4mm height clearance. Use planed softwood timber 18 x 145mm for making door linings and 12 x 44mm for the doorstep.

Other products needed will be 513-007

8 x 1 1/4" Brass countersunk screws for the hinges. You may also require, 510-000

8 x 80mm frame Fixers or 510-002 10 x 100mm Frame Fixers, 240-680 Mahogany Outdoor Sealant, 240-693 Decorators Filler, and Wickes Professional Woodstain, varnish or paint in the colour of your choice.

You will also require handles and architrave of your choice.

GENERAL INFORMATION

Hardware

French doors, demi/side panels and frames are not supplied with any of the hardware that is required to install the project. Each French door pair requires six 75mm hinges, three on each side, a rebated tubular mortise latch and a barrel bolt.

You can choose the handles of your choice from our extensive range.

Paint & Peel

Doors with this symbol have a protective film applied to the glass at the factory which allows you to paint the doors as required and then remove the film from the glass afterwards.
